

Found bugs

Homepage:

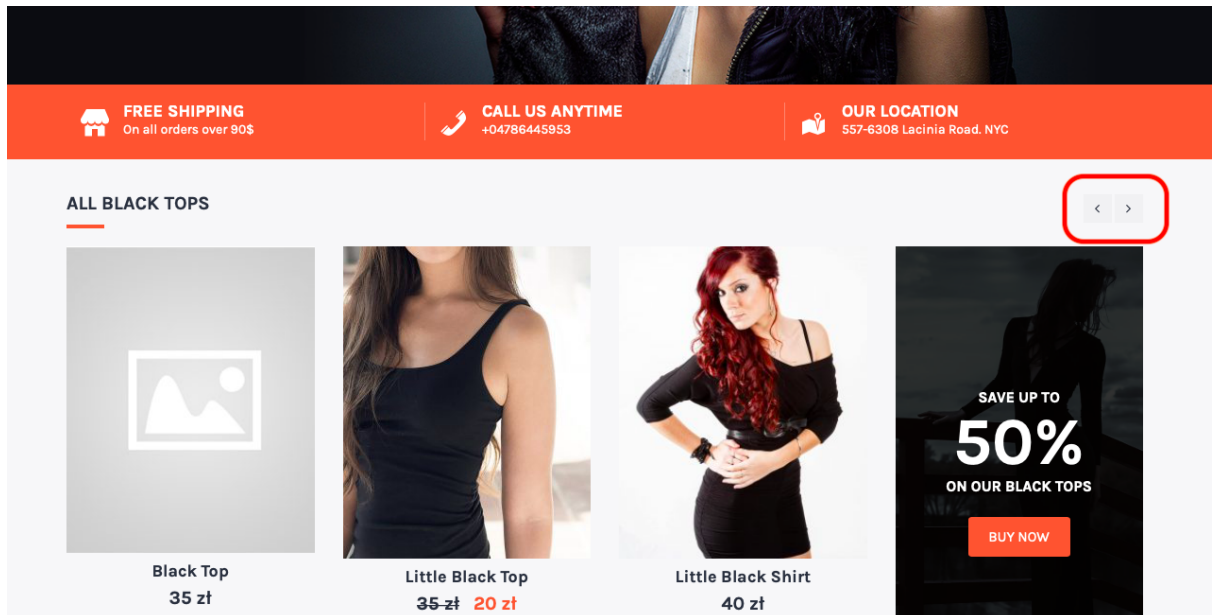

- “shop” and “categories” tabs are permanently highlighted. [UI]

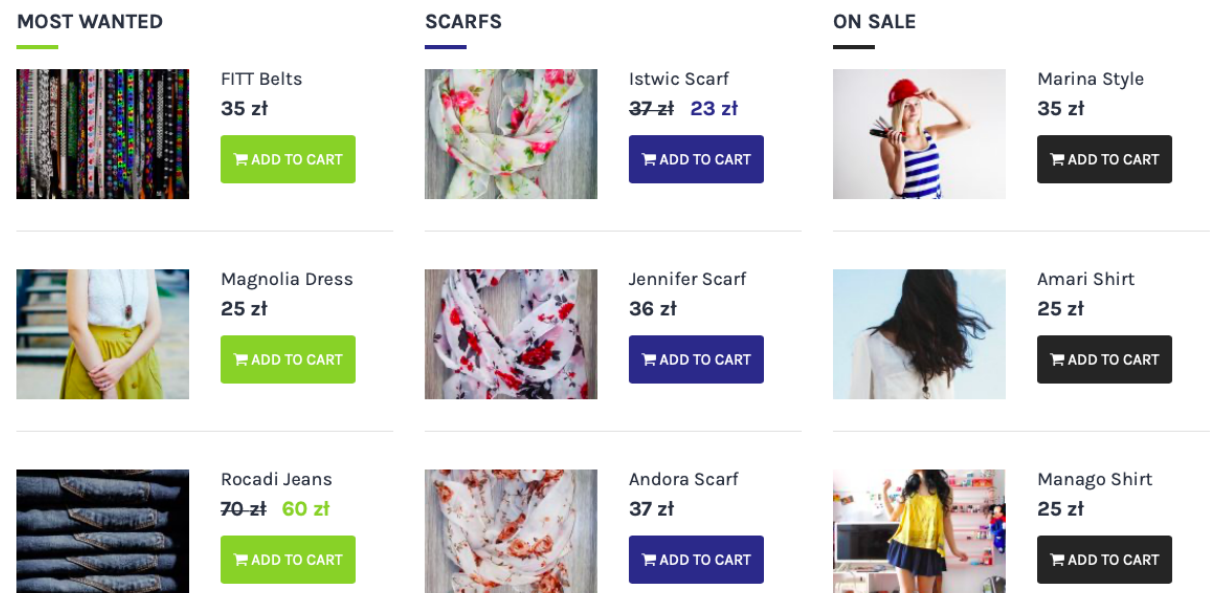

- no photo on position “Black top”. [content]

- promotion tiles ad (“up to 50%..” after pressing “buy now” error appears: “Oops! that page can’t be found.” - redirection to “<http://skleptest.pl/skleptest.pl/?s=>” [redirection]
- “High heel shoes” - wrong products in category (shirts and sweater). [content - wrong categories assigned to the products]
- All navigation arrows don’t work properly (it’s working like a “go top” button). [functional]

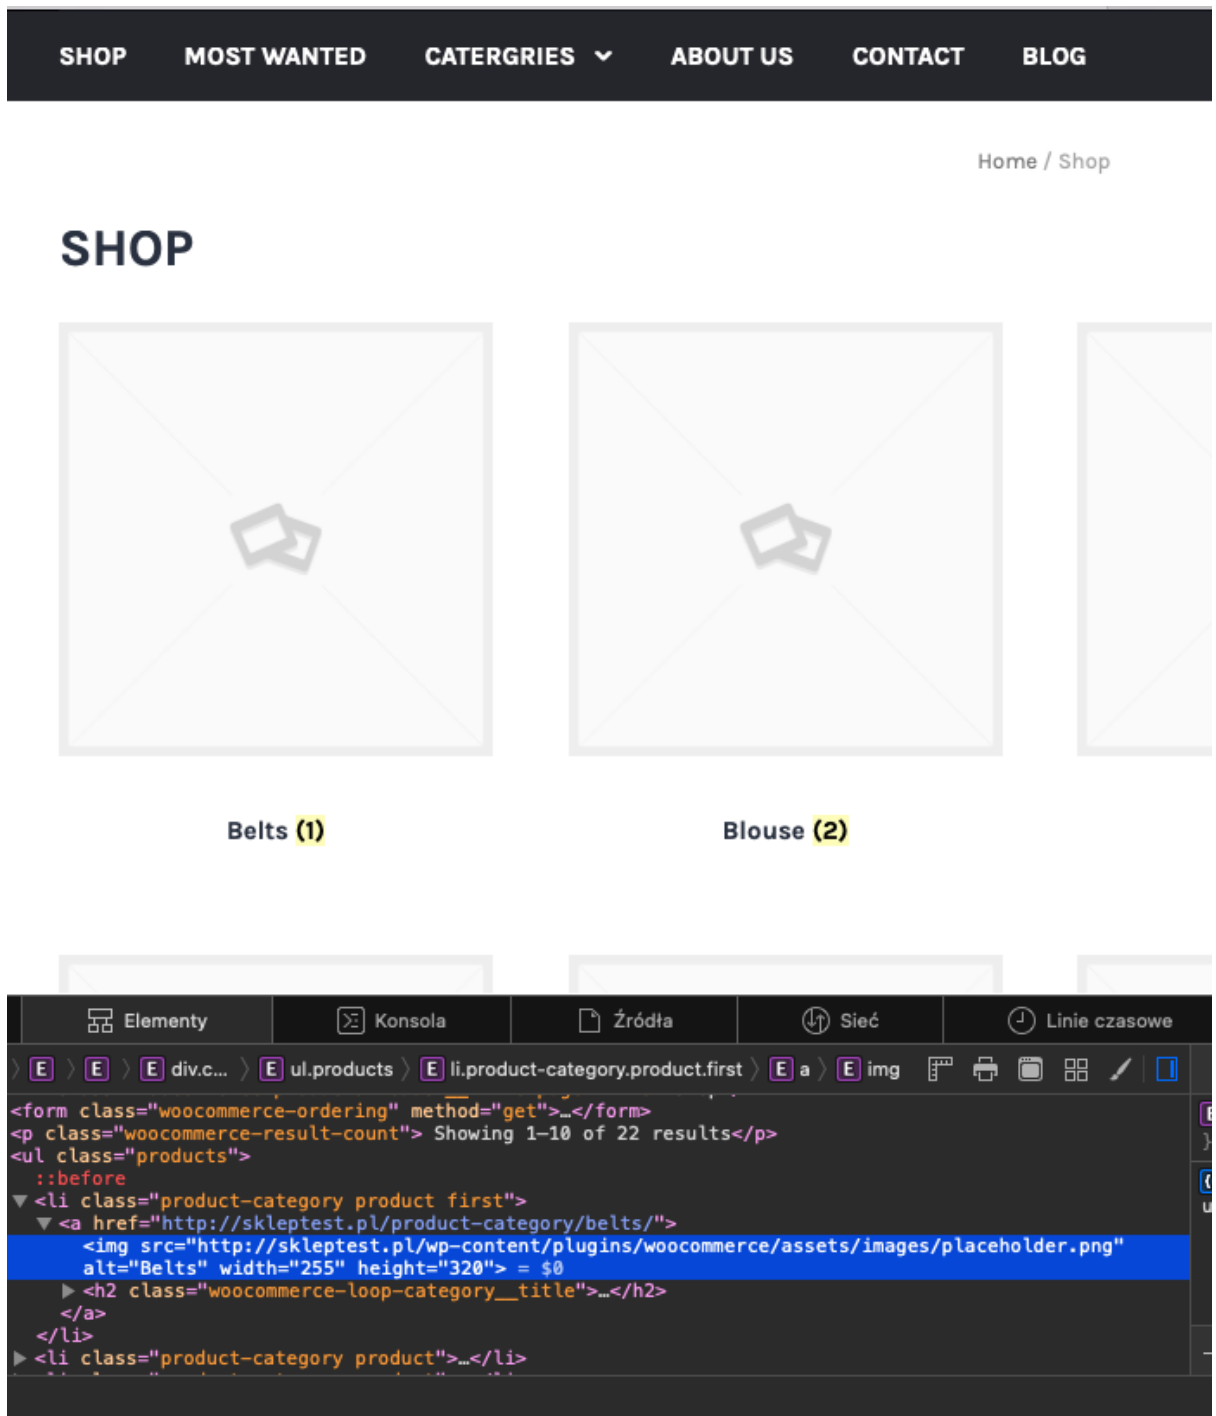

- Sections: “Most Wanted”, “Scarf” and “On Sale” have different colors on price and “Add to cart” button. (bug?) [UX]

- After clicking “shop now” in the main ad (2016 Autumn Collection) error appears “did not find the server” and the redirection has the wrong address. Clicking the “Learn more” button forwards to “Contact” not info about autumn collection. [redirection]
- On the main page user can’t go to the product site by clicking the photo of the product. [functional] - works on categories pages.

Menu:

- “Categories” tab: After browsing “Categories” then “All” there are no photos of product categories [content].

- in “Shoes” category there is a problem with product segregation (clothes appear). [content - wrong tags added] - eg. <http://skleptest.pl/product/amari-shirt/>
- Pressing the “Categories” tab doesn’t forward to the categories menu, but to the homepage. [functional]
- “About us” tab forwards to the contact form [redirection].
- “Blog” tab forwards to “Home/Tag:all” [redirection].

Contact Tab:

- Map is displayed as a text instead of map widget. [UI]

Responsive:

- [Menu tabs are reduced to “hamburger menu” in lower resolutions and “hamburger” doesn’t expand. \[functional\]](#)

Account/Registration:

- [User can create an account multiple times, with the same email address, then can’t log in to created account - error appears: “The password you entered ... is incorrect”. \[functional\]](#)

Bugs reports

Title: Account creation

Type: functional

Priority: High

Assignment: Backend Team

Description: User can create multiple accounts with one email address.

Reporter: Aleksander Zajac

Date: 07.08.2022

Attachment: sented via email

ENV: <http://skleptest.pl>

System/browser: Safari 15.5

Preconditions: User is on <http://skleptest.pl/my-account/>

Steps:

1. Fill in the field "Email Address" with any email.
2. Fill in the field "Password" with password meeting criteria.
3. Press the "Register" button. (User redirect to account page)
4. Press "Log out" on user panel
5. Go to <http://skleptest.pl/my-account/>
6. Fill in the field "Email address" with the same email as in step 1.
7. Repeat steps from 2 to 4.

Actual Result:

Second account with the same email address is created.

Expected Result:

After a second try of creating an account with the same email address, an error about an already existing account is displayed, the account is not created.

Title: Menu in responsive mode doesn't work

Type: functional

Priority: High

Assignment: Frontend Team

Description: When in responsive mode, user can't use menu bar

Reporter: Aleksander Zajac

Date: 07.08.2022

Attachment: sended via email

ENV: <http://skleptest.pl>

System/browser: Safari 15.5

Preconditions:

- User is on <http://skleptest.pl>
 - Resolution is set to px: 375 x 667
-

Steps:

1. Press the hamburger menu button.
-

Actual Result:

Menu doesn't expand.

Expected Result:

Menu should expand, and show available tabs

Title: Cart - Cannot change quantity after cart update

Type: functional

Priority: medium

Assignment: Backend Team

Description: After the change of product quantity and clicking “update cart” button, the user can’t change quantity again, until the page will be refreshed.

Reporter: Aleksander Zajac

Date: 07.08.2022

Attachment: sended via email

ENV: <http://skleptest.pl>

System/browser: Safari 15.5

Preconditions:

- User is on <http://skleptest.pl/cart/>
 - Any product in cart.
-

Steps:

1. Change the quantity of a product.
 2. Click the “update cart” button.
-

Actual Result:

After updating the cart, no other changes for quantity can be made.

Expected Result:

Quantity change can be always made, after updating a cart.

Test Cases:

Title: Adding a product to the cart

Description: Product is correctly added to the cart

Type: Functional

Priority: High

System/Browser: Safari

Author: Aleksander Zajac

Date: 07.08.2022

Preconditions:

- User is on <http://skleptest.pl>
- Cart is empty.
- At least one product is displayed on the homepage.

Steps:

1. Click the "Add to cart" button, under the product image. → "View cart" button appears. Total sum on the "my cart" button in the upper right corner is updated.
2. Click the "View cart" button. → User is redirected to cart page. Product is added to the cart table, image, name, price, qty. and total is correct.

Title: Login

Description: User can login to the application

Type: Functional

Priority: High

System/Browser: Safari

Author: Aleksander Zajac

Date: 07.08.2022

Preconditions:

- User is on <http://skleptest.pl/my-account/>
- User exist in the database (login: olekzajac@gmail.pl; password: [Tymbark123](#)).

Steps:

1. Fill in login and password fields with credentials for the user from preconditions. → Login and password typed in fields, and password is coded (asterisks).

2. Click the login button. → User correctly logged in, and redirected to my account page.

Title: User can send a message via contact form

Description: User can send a message using contact form.

Type: Functional

Priority: Low

System/Browser: Safari

Author: Aleksander Zajac

Date: 07.08.2022

Preconditions:

- User is on <http://skleptest.pl>

Steps:

1. Click the Contact tab → form with “Your name (required)”, “Your email (required)”, “Subject”, “Your message” is displayed.
2. Fill in all fields → all fields are filled.
3. Click the “Send” button → Message is sent.
